

# Mobile OS Detection Script

---

This mobile OS detection script gives you an easy-to-use script to call the user's mobile operating system on your landing page. Showing information about visitor operating system will increase the conversion rate and CTR of the landing page.

**Step 1:** Add this code just before the `</head>` tag:

```
<script src="mobile-detect.min.js"></script><script>var md = new MobileDetect(window.navigator.userAgent);</script>
```

(<http://cashmoneyaffiliate.com/download/mobile-detect-min/>)

**mobile-detect.min** (<http://cashmoneyaffiliate.com/download/mobile-detect-min/>)

DOWNLOAD 32.49 KB 248 downloads

*Note: If you already added this code to your page once, you don't have to add it again.*

**Step 2:** Add the following line where you want to see the mobile detection info on your page

```
<script>var mm=md.os();if(mm!=null) document.write(mm);</script>
```

*Note: You can insert this into a SPAN/DIV tag and use CSS to style it*
